Kugti, Kugti Lady

Thick and warm down jacket for winter outdoor use. The cut is more friendly so the jacket will not twist and rise during any kind of activities. The wide-open zipped front pockets are placed high enough to be accessible when carrying a backpack with closed hip belt. There is also an additional, easy accessible pocket on the chest for a smartphone or a wallet. On the inner side there are two open pockets to carry winter gloves or goggles and a practical zipped pocket to turn the jacket into a down pillow. The padded hood is adjustable in two dimensions to be as close to the head as possible. The bottom of both sleeves is equipped with stretch cuffs with thumb holes. Ladies' version has the same features and is tailored to fit better women's silhouette.

> 90/10 down > 600 cuin > packable in itself > neoprene cuffs >
> 3 zipped pockets > adjustable hood and bottom <

Maho, Maho Lady

Maho jacket is the perfect solution for people looking for versatile insulation jacket, providing thermal comfort regardless of the weather conditions: Primaloft® Silver insulation ensures light weight, breathability and works even when wet. Maho jacket has a technical cut which allows maximum movement freedom, adjustable bottom hem, elastic cuffs, two main pockets, one additional chest pocket, two inner pockets, one of them can be used for packing the jacket.

- > Primaloft Silver 100 > packable in itself > humidity resistant >
- > 3 zipped pockets > close fitted hood and adjustable bottom <

Gaja, Gaja Lady

Technical mountaineering jackets manufactured from robust, yet slightly elastic fabric bonded with Gelanots® 3-layer membrane. As all Milo technical garments their cut is move-friendly and keeps the jacket in the right place, pockets are placed to ensure easy access even when wearing a backpack with closed hip belt and fully adjustable hood fits a mountaineering helmet. Equipped with 4 pockets, 1 of them accessible from the inside. Available in men's and ladies' characteristics.

- > Gelanots 3S (20000mm/H₂O, 34000g/m²/24h) > high placed pockets >
- > armpit ventilation > 2-way adjustable hood and adjustable bottom <

Danai, Lahore Pants

Light, well breathing ski touring jackets and pants made of winter version of Extendo fabric. The fabric proved to be comfortable, elastic, thick enough to provide wind protection and drizzle resistant thanks to DWR finishing. The jacket is equipped with a waterproof hood hidden in the collar, 2 main pockets with wide opening zips, 1 additional chest pocket and ripstop reinforcements in the most important places when wearing a touring pack: on the shoulders and around the hips. The pants offer zipped side ventilation for better thermal control during intensive activities. Adjustable suspenders can be detached if needed. The zip-adjustable lower legs are wide enough to wear over ski touring boots and are reinforced in the most vital parts.

> Extendo Winter fabric > high placed pockets > shoulder reinforcement
> thigh ventilation > waist adjustment > detachable suspenders <

Uttar, Uttar Lady

Pants made of a warmer version of Extendo fabric, finished with a water repellent DWR layer, designed for autumn and winter mountain trips. They have a slightly raised back waist, adjustable bottom hem and side zippers to facilitate wearing them over tall trekking boots. Profiled knees ensure high wearing comfort, and the oversewn reinforcements protect the sensitive areas against damage. The pants are equipped with 5 zipped pockets. Available in women's and men's specific design.

- > Extendo Winter fabric > water repellent > 5 zipped pockets
- > calf side zips > reinforced inner legs <

Deve, Deve Lady

Highly technical hybrid fleece jackets made of Polartec® Thermal Pro® secured with a wind protecting layer in the front. The sleeves and close fitted hood are made of Nanoqpile Stretch for maximum motion freedom. This combination turns this jacket into a great choice for intensive activities carried out when the temperature is close to zero, when worn over thermal underwear and under an ultralight hardshell. Appreciated by trail runners and ski tourers.

- › Polartec Thermal Pro › wind protecting layer › 2 zipped pockets
- › thumb holes › Nanoqpile Stretch sleeves › adjustable hem ‹

Sella, Sella Lady

Technical, robust fleece jackets for all mountain use made of Polartec® Thermal Pro® with additional Extendo reinforcements. Main pockets are placed intentionally higher to allow easy access when wearing a backpack with closed hip belt. Additional zipped pocket on the chest fits a mobile phone. These jackets can be used all year long as a perfect trail companion in most demanding conditions. Available in men's and ladies' characteristic cut.

> Polartec Thermal Pro fabric > technical cut
> shoulder reinforcements > 3 zipped pockets <

Anas, Anas Lady

Thin and light Polartec 100 Micro jumper with full length front zip. Guarantees good thermal protection during any kind of outdoor activities. Equipped with 3 zipped pockets, adjustable hem and stand-up collar. Side panels and cuffs made of Nanoqpile Stretch along with regular, comfortable cut ensure versatility and great movement freedom. The jumper can be also used as second clothing layer and is available for men and ladies.

> Polartec 100 Micro fabric > universal cut
> stretch panels for better fit > adjustable hem <

Heyoo, Heyoo Lady

Closely cut fleece jumper with full length zip and integrated hood, made of Nanoqpile Stretch fabric. Great choice for a second clothing layer during any intensive activities in chilly conditions. Thumb holes help to keep the jacket in the right position and a small hood with elastic finishing warms up the head and doesn't disturb. With 2 zipped main pockets and 1 small zipped key pocket on the left arm. Available in male and female specific cut.

> Nanoqpile Stretch fabric > performance cut
> thumb hole cuffs > integrated fitted hood <

Sangri, Sangri Lady

A fleece sweatshirt that will provide comfort during intense physical activities in colder seasons of the year, especially when worn over a high performance thermal underwear. Its fitted cut ensures great freedom of movement, thanks to which the Nanoqpile Stretch fabric perfectly wicks moisture away from the body while maintaining high thermal comfort. It has two high-placed main pockets, a low stand-up collar and a bottom finish that prevents the sweatshirt from lifting.

- › Nanoqpile Stretch fabric › fitted cut › 2 zipped pockets
- › stand-up collar › anti-lifting inner silicone print ‹

Brenta

Ultimate trekking pants chosen by thousands of outdoor enthusiasts. Made of 4-way stretch Extendo fabric with additional water repellent finishing. Equipped with 4 zipped pockets: 2 in the front, 1 in the back and 1 on the thigh, adjustable leg opening and side zips on the calfs which makes wearing over tall trekking boots much easier. Inner legs, knees and bottom are reinforced with ripstop fabric. The cut is a bit wider, providing more comfort on demanding trails. These pants are commonly called by their users as the most durable, they have ever bought.

- › Extendo 4-way stretch › water repellent › 4 zipped pockets
- › calf side zips › leg opening adjustment › reinforced parts ‹

Tacul, Tacul Lady

Perfect pants for everyone who wants to enjoy great outdoors in comfort and style. Made of durable 4-way stretch Extendo fabric with durable water repellent finishing. With 2 spacious open pockets and 2 zipped pockets: 1 in the back and 1 on the right thigh. The knees and inner ankles are reinforced with ripstop which helps to keep the pants in good shape. The leg opening can be adjusted with a velcro. Tacul is available in male or female cut.

- > Extendo 4-way stretch fabric > water repellent
- > profiled and reinforced knees > 4 pockets <

Vino, Vino Lady

Straight, regular cut trekking pants made of the unbeatable 4-way stretch Extendo fabric with durable water repellent finishing. It's the most universal style which can be used either on a mountain trail or on a walk with a dog. Equipped with 5 zipped pockets and profiled knees for more comfort. Available in male or female cut, also in wider or longer version, so almost everyone can find a perfectly fitting size. Appreciated by their users for comfort and durability.

- › Extendo 4-way stretch fabric › water repellent
- › profiled knees › 5 zipped pockets ‹

Chite, Chite Lady

Light fleece sweater with integrated hood and elastic panels for great comfort and fresh look. Made of a combination of mid-weight Nanoqpile 1 and comfortable Nanoqpile Stretch fabrics. Elastic cuffs are equipped with thumb holes which help to keep the palms of Your hands warm or prevent the jacket from moving around when climbing or running. The hem is adjustable and finished with anti-lifting silicone print on the inside. Two spacious hand pockets are zipped.

- › Nanoqpile 1 + Nanoqpile Stretch fabric › comfortable cut
- › integrated hood › thumb hole cuffs › anti-lifting hem ‹

Kulti, Kulti Lady

Pure climbing pants made of natural, elastic cotton. Exceptionally designed for maximum freedom of movement, with special crotch construction, profiled knees and adjustable bottom of the legs. They also feature an integrated velcro belt closure with tape adjustment, loops for attaching a chalk bag and brush, four spacious pockets - two in the front and two in the back.

- > stretch cotton fabric > climbing cut with crotch gusset
- > profiled knees > adjustable waist and leg opening <

Jesel, Jesel Lady

Straight-cut climbing pants, made of skin-friendly and extremely comfortable cotton with the addition of elastic fibers. They have a comfortable velcro fastener with an additional possibility of tightening with a tape, profiled knees for enhanced freedom of movement and a drawstring-regulated circumference of the bottom legs. Equipped with 4 spacious pockets and an obligatory loop for attaching a chalk bag to the belt.

- > Cotton Stretch fabric > adjustable leg opening
- > climbing cut > profiled knees > climbing features <

Ubu, Ubu Lady

Climbing pants made of cotton with an addition of elastic yarn and a movement-friendly cut. Slightly tapered downwards, with an elastic welt at the bottom of the legs for easier moves on climbing routes. Thanks to profiled knees and elastic waist with the possibility of tightening with a string, they do not restrict movements. Equipped with 4 deep pockets, a loop for attaching a chalk bag and a narrow pocket for storing a brush for cleaning rocks or artificial holds.

- > stretch cotton fabric > climbing cut with crotch gusset
- > profiled knees > tapered downwards <

Zote, Thong

Jeans designed for climbing. The light and elastic material together with the construction with a gusset in the crotch and profiled knees mean that the pants will not restrict any movements. In addition, they are equipped with several climbing features, such as a loop for attaching a chalk bag, a narrow pocket for holding a brush and an adjustable circumference of the bottom legs. Zote come with four spacious pockets and one zipped pocket on the thigh. Thong, thanks to the narrow cut and 5 pockets in a classic arrangement, they will do the same great job on daily basis.

- › stretch jeans fabric › climbing cut with crotch gusset
- › profiled knees › climbing features › slim or regular fit

Jote, Jote Lady

Climbing pants that are second to none when it comes to low weight combined with high durability. They have a regular cut and thanks to the gusset in the crotch and profiled knees, they do not restrict movements. The circumference of the bottom of the legs can be pulled down so that it does not get in the way when climbing, and the waist circumference is adjustable with a tape, so you do not need to use an additional belt. The pants have 3 spacious pockets, a loop for attaching a chalk bag and a narrow pocket for a brush.

> light nylon fabric > climbing cut with crotch gusset
> profiled knees > adjustable waist and leg opening <
